

3. What is the difference between OOP and POP?

➤ Opp

- Primary focus on data.
- Takes on the bottom-to-up approach.
- Data is hidden and cannot be accessed by external functions.
- Emphasis is on data rather than procedure.

➤ Pop

- Primary focus on Functions
- Takes on the top-to-bottom approach.
- Data move openly around the system from function to function.
- Emphasis is on doing things. (procedure).
